- Redux
- Ruby on Rails
- Sketch
- Vue.js

EDUCATION

General Assembly: WDI
June 2017

**B.S., Environmental Studies,
Cum Laude**
Roanoke College
December 2013

VOLUNTEER EXPERIENCE

Blue Ridge Literacy Center

Worked pro-bono as a
photographer

Code For DC

Volunteered with the DC
Abortion Fund

With a background in environmental science and sustainability, I always welcome opportunities to apply my experience to overcome challenging problems. As a believer that the details hold everything together, I'm driven by thoughtful and creative problem-solving to make successful impacts on larger levels.

RELEVANT EXPERIENCE

General Assembly: Web Development Immersive Student

March 2017 – June 2017

Completed a 3-month Web Development Intensive. During this intensive, I learned a variety of web methodologies and frameworks. With projects used to capstone that knowledge. Creating a portfolio of projects including:

- Recib.y - Built using Ruby on Rails, Recib.y is a CRUD web application using ERB for the views, and deployed using Heroku
- Freekend - This app uses a Rails backend and AngularJS on the frontend. Using API calls, Freekend finds local events and allow users to comment on them
- Eventer - This MERN (Mongo, Express, React, Node) app created as a prototype for the Drop-In Center, a public health nonprofit. Using the Mapbox API with Leaflet, local events are saved and displayed on a map

PROFESSIONAL EXPERIENCE

Press Press Merch: Shipping Manager

April 2016 – March 2017

- Communicated production variances to management
- Ensured product quality and customer satisfaction
- Prepared shipments for postal or commercial conveyance

Gridpoint: Commissioner

December 2013 – April 2016

- Commissioned the most sites for two years in a row
- Developed extensive knowledge of product platforms to resolve product failures
- Analyzed data and trends to provide customer support and troubleshoot products
- Advised product design reviews for quality control and reliability input
- Supervised troubleshooting and corrective action activities
- Collected and displayed data in a logical manner
- Taught and mentored other support and field service personnel
